Harley-Davidson engine timeline - Wikipedia
This is a World War II Harley-Davidson flathead engine, produced for the US Army as part of the war effort. With a capacity of 45ci (740cc), the engine was standard fitment in the WLA model (along with the Canadian WLC). It featured very low 5:1 compression, allowing the engine to run on low-grade fuel.

Unopened 1942 Harley-Davidson 45 WLA Crate Engine
The bikes fitted with the Shovelhead engines were running through as much as a quart of oil in a 500 mile run. Lack of cooling fins and more severe problems. The Shovelhead was designed with just 10 fins to cool the hot components. This made the engine run hot leading to overheating. In some cases it led to a complete failure of the engine.

Since 1929, Harley-Davidson engines have also been offered as smaller V-twin motors. Sometimes these smaller models are very difficult to distinguish from their larger brothers, but one rule has remained constant: Big Twins have always carried their final-drive chains (or belts) on the left side of the bike, while the smaller models have always had them on the right.

Harley-Davidson Engines | HowStuffWorks
The Harley-Davidson Twin Cam are motorcycle engines made by Harley-Davidson from 1998 to 2016. Although these engines differed significantly from the Evolution engine, which in turn was derived from the series of single camshaft, overhead valve motors that were first released in 1936, they share a number of characteristics with nearly all previous Harley-Davidson engines.
