Homemade Hydraulic Ram Pump for Livestock Water | Land ...

Hydraulic pumps are used in hydraulic drive systems and can be hydrostatic or hydrodynamic. A hydraulic pump is a mechanical source of power that converts mechanical power into hydraulic energy (hydrostatic energy i.e. flow, pressure).It generates flow with enough power to overcome pressure induced by the load at the pump outlet.

Ram Winch

Ram pumps have been around for many decades and are popular for two main reasons: They need no external source of power -- the force of moving water gives them the power they need. They are extremely simple, with just two moving parts.

How does a hydraulic ram pump work? | HowStuffWorks

Hydraulic pumps supply fluid to the components in the system. Pressure in the system develops in reaction to the load. Hence, a pump rated for 5,000 psi is capable of maintaining flow against a load of 5,000 psi. Pumps have a power density about ten times greater than an electric motor (by volume).
